"From first to last the man, and not the events, is paramount. And nothing that helps to illuminate him has been omitted. . . . A work like this is doubly beneficent; it ennobles literature and it transfigures politics; it tells us how history should be written and how history should be made ; it consoles and strengthens the idealist in public life by describing vividly and faithfully, without evasion and without subterfuge, the endeavors and the achievements of one who summoned his countrymen away from sordid interests to lofty sentiments; it warns the enthusiast to keep within the limits to the feasible, and to be content if he can realize some fragment of his vision. It enriches posterity with an image which the youth of the future may freely worship, and to which they may repair as to a standard and an inspiration."

— *Chicago Evening Post.*

"The book is wonderful — superlative though the word may be. In comprehensiveness of grasp, in intelligent sympathy, in philosophic insight, in clearness of historical perspective, in niceness of critical judgments, and in literary style no more marvellous biography may be found in English literature. It is not merely an account of a single life, though it depicts vividly almost every phase of Gladstone's personality and work ; it is, indeed, a faithful history of political, social, economic, literary, and religious development in the England of the nineteenth century. It is one of the few books that are written 'not for an age, but for all time.' The subject is one that will never, so long as man is man, fail to quicken the intellect, to win the heart, and to charm the imagination. Of all men now living Mr. Morley is, by temperament, disposition, character, and attainment, best qualified to write of so impressive an historical figure. That the labor has been one of love is illustrated in every page of Mr. Morley's work. The Gladstone so many of us have regarded with feelings of affection and admiration is completely bodied forth in the three beautiful volumes the Macmillans have the good fortune to publish." — *Public Ledger.*

"A work which, in its distinctive excellence and because of the nature of its theme, will rank with the few really great biographies which have been produced during the past hundred years. It must take its place beside such masterpieces as Lockhart's life of Scott and Trevelyan's life of Macaulay, and the life of Tennyson, written by his son. Intrinsically, it is more valuable than any or all of these, for the reason that a biography of Gladstone is necessarily a history of England and of English politics during the greater part of the nineteenth century." — *New York American.*

"Mr. John Morley now takes a place among the few great writers of biography in our language. If the year were otherwise barren of important books, if nothing else appeared which the world would not willingly let die, the 'Life of Gladstone' (The Macmillan Company) would give rich distinction to this publishing season.

"It was Gladstone's magnificent and dominating personality that made him for generations the biggest figure in the public life of his country.

"It is Gladstone's personality that Mr. John Morley has managed to preserve in the three big volumes of the 'Life.' The impression that the record makes on you is that the man was greater even than the statesman."
